# PHOTOVOLTAIC GLASS ENAMEL FOR SOLAR PANELS

High Reflective White Enamel

Highly Transparent Color Enamel

High Reflective Black Enamel

## Features

- Highly reflective
- Improve power generation efficiency
- Corrosion resistance
- Ball impact resistance
- Weather resistance
- Heavy metal free
- Qualify performance test
- SGS environmental protection certified

# Photovoltaic Glass Enamel

Solar photovoltaic glass or PV glass utilizes solar cells to provide electricity. Proud to announce, Spinks World is now providing highly reflective photovoltaic glass enamels that are needed by solar panels. The principle of high-reflection white and black enamel is to enhance the power generation efficiency of photovoltaic modules and there is one more called as high transparent color enamel that is meant for decoration purposes. It uses a water-based enamel medium that is safe for the environment. We provide excellent quality enamel coatings that are tested for various safety parameters & magnificent outcomes.
